

NOTICE OF STUDY COMPLETION CITY OF TEMISKAMING SHORES TRANSPORTATION STUDY

THE STUDY

The City of Temiskaming Shores has completed a Transportation Study to investigate the current transportation network related problems within the City; particularly two of its downtown cores. The Transportation Study will be the City's blueprint for strategic transportation planning and direction for the future. The Transportation Study will establish a transportation system to better serve residents, employers, employees, and visitors while accommodating all modes of transportation (e.g., public transit, commuter travel, commercial vehicles, and active transportation). There is a unique opportunity through this study to create a real sense of place, a community where people choose to meet, dine, and stay for a while instead of driving through; a city where people can safely and pleasantly travel with two feet or two wheels.

THE PROCESS

The study has evaluated City-wide transport operations to develop network solutions with focus on the Downtown Cores for all modes of mobility including:

- Active & Micro-Mobility
- Transit
- Automobile
- Smart & Emerging Mobility
- Freight & Goods Movement
- Downtown Parking

In tandem with network solutions, the Study has developed supporting policies that will aid the City in guiding future development and operations in a manner that supports planned mode share changes, new sustainable mobility links, and maintains safe streets for all road users such as Road Classification & Cross-Sections, Vision Zero Policy (Traffic Calming), Intersection Implementation Policy, Transportation Demand Management Policies, etc.
