It will be the Proponent's responsibility to clarify any details in question not mentioned in this Proposal before presenting the submission. Questions relating to this proposal must be received by **Thursday March 12th, 2026, 2:00 p.m. local time.**

To ensure fairness to all Proponents, any and all questions that require clarification or that may materially alter this RFP document will be responded to and shared with other Proponents via an addendum, as described herein. Questions received after this date and time will not receive a response. Proponents are notified that any errors or omissions in the proposal may render the proposal invalid.

6. Project Schedule and Fees

Project timelines are important to the City. Accordingly, a detailed project schedule with key milestones should be included in the proposal.

The Proponent shall identify in the proposal the work that will be performed, based on the goals, objectives, and deliverables of this RFP. It is the responsibility of the Proponent to anticipate and identify all of the tasks required to perform this contract, whether or not they have been specifically identified within this RFP.

7. Scope of Work

The selected consultant will be responsible for completing engineering services for the New Liskeard Lagoon Aeration Replacement Project. The scope of work includes, but is not limited to, engineering services to achieve outcomes identified below:

Design and Installation of the Enhanced Aeration System

The successful proponent shall work with the selected vendor for the Enhanced Aeration System to verify design for inclusion into as constructed drawings.

An enhanced aeration system would include only minor modifications of the lagoon cell flow path and installation of higher capacity aeration equipment to achieve adequate treatment up to 8,000 m³/day daily flow.

It is anticipated that the modifications needed would be to divide Cell D1 into two (2) by adding a fabric baffle running east/west at the midpoint of the current cell. The upstream section, Cell D1a would have intensified aeration such that it would become a **fully mixed** zone compared to the current scenario (**partial mix** zone). The downstream section of cell D1 (D1b) would remain a partially mixed zone but with additional diffusers. Likewise, Cells D2, A1, and A2 would remain as

partially mixed aeration cells, but with an increased number of diffusers for enhanced oxygen transfer. The additional aeration requirements would require the addition of three (3) new blowers, new air piping headers as well as new aeration lines with related valves and appurtenances. The ferric sulphate dosing system in the polishing cells would need to provide a higher rate of dosing to accommodate the new flow, however this is not a major change. Additional work associated with enhancing the aeration system includes the following:

- Removal and disposal of existing aeration equipment.
- Blower building expansion to allow for additional/larger blower equipment.
- Sludge removal and geotube storage of sludge for the four existing cells receiving new aeration equipment.
- Construction of laydown area for geotubes for sludge storage on existing site.
- Reconfigure Goodman pump station inlet to upstream end of Cell D1 (headwall).
- Electrical upgrades including a larger backup generator and Motor Control Centre (MCC) to accommodate larger blowers.
- Modifications to PLC/programming changes to accommodate upgrades to aeration equipment.

Tender Document Preparation

It is the City's intent to have only one construction contract for the New Liskeard Lagoon Aeration Replacement Project. City staff will work with the successful proponent to ensure that any vendors chosen to be included in the tender documents is done in a transparent manner. This scope of work includes, but is not limited to, the following:

- Release of Tender to be no later than January 15, 2027 (to be ready for construction in Spring of 2027).
- Prepare all necessary construction tender documents for the entire project.
- Release tender documents, respond to inquiries and issue addenda.
- Assist City staff with evaluation of tender submissions.

Contract Administration

This scope of work includes, but is not limited to, the following:

- Contract Administration (CA) shall include regular meetings throughout the project, construction inspections and the development of as-constructed drawings.
- The tentative construction start date is Spring of 2027.
- It is anticipated that this project will be constructed over two (2) construction seasons (2027-2028). CA cost submission shall be based on a total ten (10) month construction period with eight (8) hour per day inspection.

Notes

1. As this project consists of the replacement of an existing treatment process, it is assumed that construction will fall under Limited Operational Flexibility as outlined in the Lagoon's Environmental Compliance Approval (ECA). Any ECA amendments to increase capacity will be captured at a future date and not a requirement of this Request for Proposal.

2. As noted above, this project is partially funded by the Provincial Government under the Health and Safety Water Stream Fund. It is important to the City that the project maximizes the timeline associated with the construction deadline of March 31, 2029, to support annual cash flow and budgeting of required municipal contribution.
3. Appendix 01 outlines a Google Earth image of the New Liskeard Lagoon and sample configuration of the enhanced lagoon configuration.
4. Appendix 02 outlines the New Liskeard Lagoon as constructed inlet structure drawings and lagoon layout.
5. Appendix 03 outlines the New Liskeard Lagoon's current aeration configuration.
6. Appendix 04 outlines the New Liskeard Lagoon's 2024 Annual Performance Report.
